BEST PRACTICES

1. Enrichment of Mother tongue:

The importance of the mother tongue is very much in our education as well as in our life. The whole of the period spent for the development of a person is decisive. And the mother tongue is closely associated with this. With this psychological basis in mind, our institute happily carries out the work of promotion of mother tongue parallel to the official curriculum throughout the year so that all the trainees get groomed in a scientific and psychological manner. Everyday we plan some small activities for developing the mastery over the mother tongue, understanding of the subject, curiosity of the subject, correct understanding of grammar, the roots of the mother tongue. We have daily routine to guide the students for their pronunciation in the mother tongue. All the teachers are involved in this activity. The use of bulletin boards for knowledge of language rules is our main focus. We also organise debate, elocution, essay competition for language mastery and activities like poetry recitation, dialogue writing, letter writing, poetry appreciation are part of our co-curricular activities. Trainees take part in such meaningful activities with interest and as a part of their responsibility.

2. Medicinal Garden:

According to the definition given by Ayurveda, a person can be considered healthy only if he is physically, mentally and emotionally healthy. The modern lifestyle is detrimental to a person's health. Serious questions have been raised about the health of each person. And it's going to get worse in the near future. This is the experience of all of us. The invaluable gift of our Indian culture, Ayurveda has focused not only on health but also on the whole world. Our various herbs are the cornerstone of Ayurveda. 50-60 years ago, vaidya (doctor) kept away a person successful from illness. This is one of the best ways to treat forest herbs. Who can do the job of reviving the forgotten art of our pride and its use and spreading it in the society more successfully than the teacher? With this idea in mind, the future teachers have created a herb garden with only 30 to 40 forest herbs in the complex of the organization which is carefully nurturing our future teachers with the value that makes them dedicated, helpful and indispensable for this invaluable and indispensable service. Our tradition of recognizing, understanding and using all these herbs, which are easily accessible and very helpful for future teachers is becoming beneficial for all.

3. Add on courses:

We focus on the academic part of the trainees giving full emphasis on curricular as well as life skill development. For that, we are having three Add on courses- Yoga Education, Sanskrit Sambhasan and Basic Computer skills. Every year, our all trainees get training and knowledge of these three different types of subjects which are very necessary for their professional career as well as for their personality development.
